

GLOBALIZATION

The *Kappe Library Guides* identify general resources on broad topics to help researchers begin their work. Individual projects and practitioners are avoided; guides, indexes and general introductions are preferred to specialized works.

Book citations that include a call number can be found at the Kappe Library; other books are identified by author, title and date. Magazine articles are selected from the *Avery Index* and the *Art Index* databases; to identify which are available at the Kappe Library, see the *Periodicals In the Collection* reference.

Web versions of this and all other Guides are available at <http://www.sciarc.edu/v5/aboutarch/lrg.php> and <http://sciportal.sciarc.edu> Submit questions and suggestions to the library manager directly at kevin@sciarc.edu

NOTE

"Globalization" is used here as an umbrella term for characteristic post-Cold War trends such as

- the integration of national markets into a worldwide investment environment,
- the proliferation of fast, dependable and accessible systems of transportation and communication, and
- the polarization of rich and poor.

"Globalization" also covers cultural trends such as

- the geographic dispersal of production processes, and
- the dissemination of international, regional, traditional and individual cultural products.

Also significant are counter-trends such as isolationism, antifederalism, criminal states and cultural and religious fundamentalism.

Researchers should be prepared to encounter a mass of academic, commercial and popular literature produced under the assumption that the most appropriate means of representing globalization is through hyperventilated claptrap. Fortunately, substantive resources exist, and can be found with a little time and careful scrutiny.

TOOLS TO GET STARTED

Bauman, *Globalization: the Human Consequences*, HM73.B28 1998
 Beck, *What Is Globalization?*, HF1359.B4132000
 Globalization Studies, <http://www.globalize.org/>
 Hirst, *Globalization in Question*, 2nd, HF1359.H575 1999
 Lexis-Nexis Academic Universe, <http://www.lexis-nexis.com/universe> (Archive of world news. Access limited to SCI-Arc workstations.)
